## ABOUT YOUR HOME-DELIVERED MEAL

Every meal provides an average of 700-800 calories and a minimum of 1/3 of the Dietary Reference Intake of significant vitamins and minerals.

Your meal has no salt added and most have less than 1,200 mg of sodium per meal. Most meals come with bread or a roll, dessert, 8 oz. of milk.

Food safety is important. If you do not eat your meal when it is delivered, please refrigerate it immediately.

## Keeping Your Food Safe After a Power Outage

After the loss of power, refrigerated or frozen foods may not be safe to eat. Keep refrigerator and freezer doors closed. If you do, your refrigerator will keep food safe for up to 4 hours without power;

- a full freezer will keep food safe for 48 hours;
- a half-full freezer will keep it safe for 24 hours.

**After 4 hours without power, throw out refrigerated foods like meat, fish, eggs, milk and leftovers.**

You can safely refreeze or cook food from the freezer if the food still contains ice crystals and feels as cold as if refrigerated.

- Throw out any food with an unusual color, odor, or texture.
- Never taste food to determine if it is safe to eat.

### WHEN IN DOUBT, THROW IT OUT
